

In view of the emergency situation arising out of the ongoing COVID-19 pandemic, it has been decided to close down the General OPD in the Centenary Hospital. All are advised to not come to Centenary Hospital for minor ailments or routine medicines.

As has been notified earlier, all KoPT beneficiaries can purchase their routine medicines from their neighborhood pharmacy and the money would be reimbursed on submission of the bills.

For minor ailments, all are requested to make use of the Telemedicine facility and use the COVID-19 Helpline which is functioning 24x7.

The Centenary Hospital will only have a 'FEVER CLINIC' during working hours and a Casualty section which functions round the clock.

Only patients with some severe emergency or fever or cough or flu like symptoms should attend Centenary Hospital until further notice.

The above measures are being taken to minimize the chance of cross infection and to prevent the spread of COVID-19.
