For computing the cargo mobilization per sq. m area the total quantity mobilized through a particular plot during the license period either through Import or Export, which will be ascertained from the Final Draft Survey Report, will be considered for computing the remission.

For Export Cargo:

HDC maintains stock records of each and every plot, which the licensees of plots updates with the volume of cargo stored by them in each plot under their possession. The cargo mobilizationper sq. m from a particular plot will be computed on the basis of the quantum of cargo shippedfrom that particular plot which will be ascertained from the Final Draft Survey Report after completion of work of each and every vessel.

For the purpose of calculation of the productivity, the working time of the vessel will be calculated from haul in time till completion of cargo work. For failure or success in achievingthe stipulated discharge rate, penalty/ incentive will be applicable as follows:

⁽a) If the working time of the vessel (considering hauled in time till completion of cargo work at working berth) exceeds the stipulated time based on the above productivity norms by 2 hours or less, then no penalty will be levied

⁽b) If the working time of the vessel (considering hauled in time till completion of cargo work at working berth) exceeds the stipulated time based on the above productivity norms beyond 2 hours,

However, there will be noincentive for saving of time up to 2 hours.			
	Note to provisions regarding Penalty/ Incentive Norms:

	If Propane & Butane are discharged simultaneously even for a smaller period, the benchmark pumpin rate prescribed for Simultaneous discharge of Butane & Propane would be applicable for calculatin penalty / incentives. However, for discharging Propane & Butane or some other cargoes one by one hauled in time to finished work time of the firstcargo and finished work time of 1st cargo to finished work of 2nd cargo is to be considered for calculating penalty/incentives. More so, in case of simultaneous discharge of cargo otherthan Propane & Butane, duration from Hauled in Time to Finished Work Time (for the1st cargo) and Commencement of Work to Finished Work Time (for 2nd cargo) is to be considered.
